

What does CwMAG do?

We all know CwMAG for their annual conference which is always full of excellent presentations and a great workshop, but what else *can* we do for you?

We're looking for representatives to join the committee who can make a difference and help us to achieve our goal:

- Providing a forum for clean water modelling professionals to share operational best practice.
- Educating clean water modelling professionals, water delivery service agencies and the public by holding events, operating a website and disseminating useful learning

Are you an expert or champion in what you do or are you a 'rising star' in your organisation with a real passion for our field of work who is looking for development and wants to make a difference.

If your water company or consultancy company are not currently represented on the committee and you are able to do so, apply now by sending an email to our membership secretary, Simon Croft:

membership@cwmag.org

Visit our website to find out who is your committee representative.

2024 Conference

committee meeting where we have started to plan for the conference. Keep a watch out for a call for papers for the annual conference coming soon!

The Next Generation!

The committee is full of people with a lot of experience of the water industry.

But what about the next generation?

I joined SEW 3 years ago during the height of covid when no one was allowed in the office. This meant I had to learn and adapt quickly in this new way of working remotely.

How many people also joined the modelling industry post-covid. How effectively have we passed on knowledge and experience without being in the office 5 days a week?

Training the next generation of clean water modelling professionals is something we are all passionate about to ensure that the knowledge and experience is not lost and that new people joining our industry are taught best practices which can be achieved through the Clean Water Modelling Advisory Group!

We want to make this the best space to grow and learn in your role and be the go-to forum for the industry.

People are the key resource. Do we have enough resources for AMP 8 and beyond?

Have you visited the Best Practice Guide to Hydraulic Modelling? <https://cwmagblog.wordpress.com/category/guidance-notes/>

Best Wishes,

Lisa Chapman (South East Water)

Lunch and Learn

As well as the annual conference we are aiming to provide webinars to be able to pass on experience and knowledge. What does it take to be a holistic modeller? More than just running a model?

Use the link below for what webinar sessions you would like to see:

<https://www.surveymonkey.com/r/5QS63FV>

There is a section for **your** additional comments and webinar ideas which we will review so please provide as much feedback as possible to help us provide the topics that you want to hear about to support your development.

Membership Details

Are your membership details up to date?

You can log into your CwMAG membership account below and update your details easily using your email address and password. You can also reset password via the link below.

<https://webcollect.org.uk/cwmag>

Every organisation/ company has a person who is marked as an administrator in CwMAG, can they please log into their CwMAG account to ensure that all the members in their organisation are correct.

Any problems logging into your account you contact us via email membership@cwmag.org
